

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ANNOUNCEMENT OF THE COURSE

IN THE

SCHOOL OF PHARMACY

1906-1907

AND

CATALOGUE OF STUDENTS,

1905-1906.

PUBLISHED BY PURDUE UNIVERSITY, AT LAFAYETTE, INDIANA.

IN OCTOBER, NOVEMBER, FEBRUARY, MARCH AND APRIL.

Entered at the Postoffice at LaFayette, Indiana, as second-class matter.

UNIVERSITY COURSES OF STUDY.

Purdue University embraces seven departments of instruction, the courses in each of which extend through four years and lead to the degree of Bachelor of Science (B. S.)

These departments are:

1. A SCHOOL OF MECHANICAL ENGINEERING.
2. A SCHOOL OF CIVIL ENGINEERING.
3. A SCHOOL OF ELECTRICAL ENGINEERING.
4. A SCHOOL OF SCIENCE.
5. A SCHOOL OF AGRICULTURE.
6. A SCHOOL OF PHARMACY.
7. A SCHOOL OF MEDICINE.

PURDUE UNIVERSITY

TWENTY-THIRD ANNUAL ANNOUNCEMENT

OF THE

School of Pharmacy

1906 - 1907.

INDIANAPOLIS:

WM. B. BURFORD, PRINTER AND BINDER.

1906.

BOARD OF TRUSTEES.

WILLIAM V. STUART.....	LaFayette.
DAVID E. BEEM.....	Spencer.
SYLVESTER JOHNSON.....	Irvington.
JAMES M. BARRETT.....	Fort Wayne.
JOB H. VAN NATTA.....	LaFayette.
CHARLES DOWNING.....	Greenfield.
CHRISTIAN B. STEMEN, M. D.....	Fort Wayne.
CHARLES MAJOR.....	Shelbyville.
ADDISON C. HARRIS.....	Indianapolis.

OFFICERS OF THE BOARD.

WILLIAM V. STUART.....	PRESIDENT.
DAVID E. BEEM.....	VICE-PRESIDENT.
EDWARD A. ELLSWORTH.....	SECRETARY.
JAMES M. FOWLER.....	TREASURER.

CALENDAR 1906-1907.

1906.

Entrance examination.....	Tuesday, September 11, 8:30 A.M.
Examination of delinquents...	Tuesday, September 11, 8:30 A.M.
First semester begins.....	Wednesday, September 12, 10 A.M.
Thanksgiving recess...	November 28, 12 M. to December 3, 8 A.M.
Christmas holiday begins.....	Saturday, December 22, 12 M

1907.

Christmas holiday ends.....	Thursday, January 3, 8 A.M.
First semester ends.....	Saturday, February 2, 12 M.
Second semester begins.....	Monday, February 4, 8 A.M.
Commencement, School of Pharmacy....	Wednesday, March 27.
Commencement day.....	Wednesday, June 12.

SCHOOL OF PHARMACY.

FACULTY.

WINTHROP ELLSWORTH STONE, PH. D.
President of the University.

ARTHUR L. GREEN, PH. C.; M. D.; PH. D.,
Dean and Professor of Chemistry.

STANLEY COULTER, PH. D.,
Professor of Biology.

JULIUS W. STURMER, PH. G.,
Professor of Pharmacy.

BENJAMIN M. HOAK, PH. G.,
Assistant Professor of Materia Medica.

*ALPHA B. OTTO, PH. G.,
Assistant in Chemistry.

**DAISE MAE EMSHWILLER, PH. G.,
Assistant in Chemistry.

*Until January, 1906.

**From January, 1906.

SPECIAL LECTURERS.

In addition to the regular members of the faculty the following named special lecturers have assisted in certain instruction :

Pharmaceutical Jurisprudence—

MARTIN A. QUINN, LaFayette.

Different Commercial Topics—

THOMAS BURK, Traveling Salesman with Mooney-Mueller Drug Co., Indianapolis.

AUGUST J. DETZER, Traveling Salesman with Mooney-Mueller Drug Co., Indianapolis.

CHARLES DOWNING, Traveling Salesman with A. Kiefer & Co., Indianapolis.

J. K. LILLY, President Eli Lilly & Co., Indianapolis.

LOUIS H. SCHULMEYER, Chemist with Daniel Stewart, Indianapolis.

A. L. WALTERS, Botanist with Eli Lilly & Co., Indianapolis.

JOHN S. WRIGHT, Botanist with Eli Lilly & Co., Indianapolis.

COMMITTEE ON EDUCATION OF THE INDIANA PHARMACEUTICAL ASSOCIATION.

C. E. ELLIOTT, Sheridan.

W. O. GROSS, Ft. Wayne.

GENERAL STATEMENT.

PURDUE UNIVERSITY is the State Institute of Technology. It derives its name, through legislative enactment, from John Purdue, who gave to the State for the use of the institution one hundred and fifty thousand dollars. It has also received a number of gifts from other individuals.

It has an endowment fund of three hundred and forty thousand dollars, received from the general government, and is further supported by legislative appropriations and by the proceeds of annuities granted by the general government.

Its nonproductive plant is valued at about nine hundred and fifty thousand dollars. This includes one hundred and eighty acres of land, twenty-eight buildings, and a most extensive equipment, including laboratories, shops, museums, library and reading rooms.

The School of Pharmacy of Purdue University offers excellent training for those who expect to engage in the retail drug business and for those who desire to enter the laboratory of a manufacturing pharmacist. The instruction also consti-

tutes a good preparatory course for those who anticipate attending a school of medicine.

Students are engaged at the University about six hours each day. About two-thirds of this time is devoted to laboratory work, and one-third to lectures and recitations. There are neither lectures, recitations nor quizzes in the evening, that time being allotted to home study and to preparation for the ensuing day's work. The student has, therefore, no time for clerking in a drug store, and must devote his undivided time and energy to his school work.

A complete catalogue of the University will be sent on application.

All correspondence relating to the School of Pharmacy should be addressed to ARTHUR L. GREEN, DEAN, LAFAYETTE, INDIANA.

SPECIAL STATEMENT REGARDING THE PHARMACY LAW, AND THE RULINGS OF THE BOARD OF PHARMACY.

An act of the Legislature of 1899 requires all druggists in Indiana to obtain a license. In order to secure such license the applicant must (1) pass an examination—(2) according to the grade of license sought, must have had either two or four years' experience in a drug store or pharmacy.

Section 3 of this act provides further that,

"In the case of an applicant for license as a Registered Pharmacist or as a Registered Assistant Pharmacist, who is a graduate of a school of pharmacy of such standing and requirements as are satisfactory to the Board of Pharmacy, the actual time spent in attendance at such school, shall be accepted as an equivalent for a term of service of equal length in a store or pharmacy where physicians' prescriptions are compounded."

The authorities of Purdue University are gratified to be able to announce that the Indiana Board of Pharmacy, at its regular meeting held July 12, 1899, had under consideration the standing and requirements of Purdue School of Pharmacy and found the same satisfactory in all respects. In accordance with this decision, it agrees, in the case of graduates of this school, to accept the time spent in attendance as an equivalent to an equal time spent in actual service in a store or pharmacy.

On April 12, 1905, the Board of Pharmacy adopted the following resolutions regarding schools and colleges of pharmacy :

Resolved, That after January 1, 1906, the privilege of counting time spent at college as equivalent to an equal length of time in a drug store shall be granted only to graduates of such school or college as conform to the following standard :

I. The school or college shall require that its candidates for admission show evidence of either having completed the first year in a commissioned high school, or of having completed an equivalent amount of work in any other school or academy.

II. Said school or college shall require for graduation an average grade of not less than 75 per cent.

III. The course shall consist of at least two school years of not less than 26 weeks each, excluding holidays.

IV. During the school years sufficient school work shall be provided so as to make clerking in a store impracticable.

Purdue School of Pharmacy conforms to these requirements, and is, as has been stated, recognized by the Indiana Board of Pharmacy.

THE PHARMACEUTICAL LABORATORY.

EQUIPMENT.

LABORATORIES.—These are properly furnished with weighing tables, supply shelves, and individual working tables for the accommodation of over 100 students.

STORES AND STORE ROOMS.—All apparatus, drugs and chemicals used in the laboratory work described in the succeeding pages are furnished by the University; none need be supplied by the student. To expedite the issuing of drugs and chemicals there are special store rooms, as follows: One containing supplies for manufacturing chemistry and pharmacy, one for analytical chemistry, one for prescription work, and one for supplies in pharmacognosy and microscopy. The apparatus is kept in a general store room, and is furnished the student by a "storekeeper," who is always in attendance during laboratory hours. We believe that the system employed for the distribution of supplies and apparatus to the students works the highest possible convenience. Much of the student's time is saved thereby.

SPECIAL APPARATUS.—In addition to the apparatus already mentioned, there is the usual lecture

table apparatus for lecture experiments in chemistry and pharmacy. Also a fine stereopticon, with reflectoscope attachment, and special apparatus for special work; for instance, a Laurent polariscope, a combustion furnace, a Eureka tablet machine, pill coaters, all the modern suppository machines, etc.

WEIGHING FACILITIES.—For quantitative analysis, there are 15 fine analytical balances—eleven Sartorius short arm, sensitive to .0001 Gm.; two Becker's analytical balances, and two balances made by Eimer & Amend. The prescription room is well supplied with prescription balances and the general laboratories with balances for less delicate weighing.

SPECIMEN CABINETS.—For the study of pharmacognosy there are cabinets of over 2,500 specimens of drugs, chemicals and preparations. These cabinets are for class work, and are known as "working cabinets." There is also the Eli Lilly & Co. reference cabinet of crude drugs (roots, barks, leaves, flowers, seeds, etc.), as they occur in the drug market. Finally a collection of rare drugs, an herbarium of medicinal plants, and a collection of minerals. For microscopic pharmacognosy, and for the detection of adulteration in drugs, there are microscopes, and appliances for section cutting, mounting and similar work.

BOOKS AND REFERENCES.—The leading pharmaceutical journals are kept on file, accessible to the

A CASE OF GLASSWARE IN THE APPARATUS STORE ROOM.

A CORNER IN THE BALANCE ROOM.

student. Students also have access, under certain restrictions, to the standard reference books on materia medica, chemistry and pharmacy. In the general library is the "Eliel Alcove," containing reference books presented to the School of Pharmacy by Mr. Leo Eliel, of South Bend, Indiana.

MEDICINAL PLANT FARM.—About one mile west of the University is situated a four-acre piece of land, donated to the School of Pharmacy by Mr. W. W. Young. This land furnishes a portion of the material for the courses in botany and medicinal plants.

EXERCISE IN PHARMACY LABORATORY WORK.

COURSES OF STUDY.

Purdue University offers two courses of study in Pharmacy:

1. In the School of Pharmacy is offered a course of two years, the first year continuing thirty-eight weeks, and the second year twenty-seven weeks. This course leads to the degree of Graduate in Pharmacy.

For a description see page 17.

2. In the School of Science is offered a course including the general subjects of English, modern languages, mathematics, history, economics and natural sciences, with a series of electives in pharmaceutical subjects. This course is four years in length and leads to the degree of Bachelor of Science in Pharmacy.

For information, see the University catalogue or address the Registrar of the University.

COURSE IN THE SCHOOL OF PHARMACY.

DEGREE GIVEN.

Graduate in Pharmacy.

LENGTH OF COURSE.

Two years: One of thirty-eight and one of twenty-seven weeks. The next year opens Wednesday, September 12, 1906.

REQUIREMENTS FOR ADMISSION.

Candidates for admission must show evidence of either having completed the first year in a commissioned high school, or of having completed an equivalent amount of work in any other school or academy. Store experience is not a requirement for admission.

REQUIRED SUBJECTS

FIRST YEAR.

SUBJECTS.	No. of Hours in Lecture Room.	No. of Hours in Labora- tory.
1. <i>Pharmacy</i>	103	165
2. <i>General Chemistry</i>	160	82
3. <i>Analytical Chemistry</i>	60	285
(a) <i>Inorganic Qualitative Analysis.</i>		
(b) <i>Organic Qualitative Analysis.</i>		
(c) <i>Toxicology.</i>		
(d) <i>Quantitative Analysis.</i>		
4. <i>Materia Medica</i>	140	
5. <i>Botany</i>		34
6. <i>Diseases</i>	80	
Total number of hours for the year.	493	566
Average per week	28	

SECOND YEAR.

7. <i>Pharmacy</i>	61	280
8. <i>Prescription Work</i>	20	100
9. <i>Chemistry</i>	135	54
10. <i>Materia Medica</i>	108	
11. <i>Microscopic Analysis</i>		25
(a) <i>Analysis of Drugs.</i>		
(b) <i>Analysis of Urine.</i>		
Total number of hours for the year.	324	459
Average per week	29

AN OPERATION IN MANUFACTURING CHEMISTRY AND PHARMACY.

DESCRIPTION OF THE REQUIRED SUBJECTS.

FIRST YEAR.

I. Pharmacy.

Class Work, 103 Hours.

(a.) Lectures and recitations on systems of weight and measure, specific gravity and its practical utility; on heat, its generation, its measurement and its use in pharmacy.

There will also be lectures and recitations on the various processes and manipulations which find application in pharmaceutical practice: as comminution, solution, filtration, evaporation, precipitation, crystallization, percolation, etc., etc. The working formulas for the manufacture of pharmaceutical preparations will be given; the various methods will be criticised and the merits and demerits of each pointed out to the student.

(b.) The official, and the important unofficial galenical preparations will be subjected to systematic study. Special attention will be given to the chemistry involved.

(c.) The composition of the more important galenical preparations and composite medicines will be studied.

(d.) A practical course in *pharmaceutical arithmetic* will be given. Calculations which find application in practical pharmacy, in manufacturing, and in analytical work, will be taught.

Laboratory Work, 165 Hours.

In the laboratory each student will make, independently, though under the personal supervision of the instructor, the following preparations:

Medicated waters.
Solutions.
Syrups.

Extracts.
Masses.
Glycerites.

CLASS IN QUALITATIVE ANALYSIS.

Elixirs.	Confections.
Infusions.	Honeys.
Decoctions.	Powders.
Vinegars.	Oleates.
Tinctures.	Ointments.
Fluid extracts.	Cerates.
Soluble extracts.	Plasters.
Spirits.	Pills.
Mucilages.	Capsules.
Mixtures.	Troches.
Liniments.	Suppositories.
Emulsions.	

This, like all the laboratory work in the course, is obligatory; but students who have had much experience and have acquired special skill in manufacturing will be excused from part or all of the above and provided with advanced work.

2. General Chemistry.

Class Work, 160 Hours.

(a.) Nomenclature and Notation. Students learn thoroughly the scientific names and the symbols of the more important chemical elements, and the scientific names and chemical formulæ of various inorganic compounds, such as hydroxides, oxides, acids, salts and anhydrids.

(b.) Recitations on General Inorganic Chemistry.

(c.) Recitations on General Organic Chemistry. A study is made of the classification of organic compounds, their scientific names, and their molecular and graphic formulæ.

Laboratory Work, 82 Hours.

(a.) Experiments are performed in General Inorganic Chemistry.

(b.) In this part of the laboratory work the student has practice in the recognition of chemicals by inspection.

3. *Analytical Chemistry.*

Class Work, 60 Hours.

Laboratory Work, 285 Hours.

(a.) Inorganic Qualitative Analysis.

Rules are committed on precipitation and on solubility. These rules are of great value, not merely in analytical work, but also in prescription work, where they aid the student in the study of the incompatibilities of inorganic substances. The general processes for the detection of acids and bases are studied by the student. He is also taught to write the equation for each chemical reaction.

In the laboratory the student verifies the rules on precipitation and solubility; he becomes thoroughly familiar with the chemical behavior of the various acids and bases; he repeatedly works through a scheme of separation and identification of the acids and bases; he then subjects individual unknowns (mixtures of chemical compounds) to a qualitative examination, and reports his results to the instructor.

(b.) Organic Qualitative Analysis.

Lectures and laboratory work on the identification of the more important organic compounds

(c.) Toxicology.

This subject includes the detection of inorganic and alkaloidal poisons, in the presence of other organic material. The student will work on poisoned food, separating and identifying the poisons.

(d.) Quantitative Analysis.

Lectures and laboratory work on *Pharmaceutical Assaying*, which consists in the quantitative estimation of the active constituents in crude drugs and pharmacopoeial preparations. This work familiarizes the student with the various standard methods of assaying.

4. *Materia Medica.*

Class Work, 140 Hours.

Recitations on official and unofficial medicines. A thorough drill is given on Latin and English names. History and habitat are given whenever of practical importance,

The student will be taught to identify chemicals, and crude vegetable and animal drugs by physical characteristics—appearance, taste, and color.

5. Botany.

Class and Laboratory Work, 34 Hours.

(a.) Lectures: Treating of the embryo, germination with its conditions and phenomena, structure and functions of the parts of the plant body, assimilation, respiration, growth, irritability, movements and fertilization.

(b.) Laboratory Work: A general study of the parts of the plant, and of plant families.

(c.) Laboratory work in which the student learns to identify and collects medicinal plants growing in this vicinity, making frequent trips to the surrounding country for this purpose.

6. Diseases.

Class Work, 30 Hours.

Lectures are given on physiology and the diseases of the human body. Study is made of the different therapeutic classes of medicine.

SECOND YEAR.

7. Pharmacy.

Class Work, 61 Hours.

Lectures and recitations on processes of preparation, impurities, and adulteration of chemical and pharmaceutical substances, with special reference to the manufacturing in the small way, as in the drug store.

At the end of this subject examinations are given on the Pharmacy of the first and second years, and in Prescription Work.

Laboratory Work, 280 Hours.

Each student will make the following:

(a.) Inorganic Preparations. Crystallized sodium carbonate (from soda ash), sodium benzoate, sodium iodide, sodium

CLASS IN PRESCRIPTION WORK.

bromide, sodium hydrate, sodium sulphite, sodium phosphate, sodium chlorate, sulphurated potassa, potassium acetate, copper sulphate, magnesium carbonate (light), magnesium carbonate (heavy), precipitated calcium phosphate, zinc chloride, red mercuric iodide, yellow mercuric oxide, red mercuric oxide, mercuric chloride, mercurous chloride, mercuric subsulphate, nitrogen monoxide, nitric acid, ammonia water, chromic anhydride, precipitated sulphur, hydrochloric acid, chlorine water, solution of chlorinated soda, dilute hydrobromic acid.

(b.) Organic Preparations. Methane, chloroform, iodoform, alcohol (by fermentation), absolute alcohol, ether, ethyl acetate, potassium cyanide, hydrocyanic acid, oleic acid, soap, glycerin, ethylene bromide, acetylene, benzene (by distillation from crude benzole), nitrobenzene, aniline, sodium phenol-sulphonate, picric acid, benzoic acid.

(c.) Elegant Pharmaceuticals. Official and national formulaary preparations, such as syrup of ferrous iodide, syrup of hydriodic acid, compound syrup of hypophosphites, syrup of white pine expectorant, elixir of iron, quinine and strychnine, of pepsin, bismuth and strychnine, granular effervescent salts, scale salts of iron, etc. Also certain toilet preparations which can be profitably manufactured in the store.

8. Prescription Work.

Class Work, 20 Hours.

(a.) Lectures in prescription reading, including Latin terminology, pharmaceutical nomenclature, and Latin phrases. There will also be class drills in reading prescriptions, for which purpose an extensive collection of lantern views for facsimile prescriptions has been made. In addition, the students have the use of thousands of prescriptions taken from the files of drug stores. This collection represents the prescription work of the principal cities of our State.

(b.) Lectures and recitations on incompatibilities.

Special attention is paid throughout the year to doses, solubility of chemicals, and to the composition of pharmaceutical preparations.

AN OPERATION IN PHARMACEUTICAL ANALYSIS.

Laboratory Work, 100 Hours.

In the dispensing laboratory, students experiment with incompatible mixtures, thereby becoming familiar with the difficulties commonly met with at the prescription counter, and learning how best to overcome them. Numerous prescriptions taken from the files of drug stores, besides many typical ones furnished by the instructor, are filled by the students.

The acquisition of manipulative skill—skill in measuring, weighing, powder folding, pill rolling, capsule filling, etc.—constitutes a prominent feature of this work.

9. Chemistry.*Class Work, 135 Hours.**(a.) Pharmaceutical Chemistry.*

An extended study is made of the chemistry of pharmacy and medicine.

(b.) Physiological Chemistry: Lectures on foods, digestion, digestive ferments; also on the fluids and excretions of the body.

*Laboratory Work, 54 Hours.**(a.) Chemical Analysis of Urine.**(b.) Identification of official chemicals by inspection.*

At the end of this subject examinations are given on the General Chemistry and the Analytical Chemistry of the first year, and on the Chemistry of the second year.

10. Materia Medica.*Class Work, 108 Hours.*

Lectures and recitations. This subject includes all the official and many unofficial substances used in medical practice; inorganic and organic chemicals, natural products and crude drugs.

A study is made of their sources, Latin and English names, physical and chemical properties, compounds or preparations, medical action and use, antidote and dose. In case of crude drugs, the part used, active constituents, the geographic source, and adulterations, are also given attention.

At the end of this subject examinations are given on the *Materia Medica* of the first and second years.

II. Microscopic Analysis.

Laboratory Work, 25 Hours.

(a.) General Microscopic Technique.

Practice is had in section cutting, staining and mounting.

(b.) Microscopic Analysis of Drugs.

The following drugs are examined microscopically: Rhubarb, beeswax, lupulin, lycopodium, acacia, elm, mustard, pomegranate, gamboge, kamala, senna, saffron, lactucarium, pepper, capsicum, ginger, allspice, cloves, cinnamon, mace and nutmeg, quillaja, quassia, digitalis, cinchona, podophyllum, belladonna.

(c.) Microscopic Analysis of Urine.

Examinations are made of normal and abnormal urine. The student is furnished with natural (not artificial) samples, obtained through resident physicians.

LAW LECTURES.

These are divided into two groups:

(a.) Dealing with checks, drafts, notes, mortgages, mechanics' liens, partnership, corporations, bankruptcy, leases, etc.

(b.) Dealing with pharmaceutical legislation and with the special legal responsibilities of the pharmacist.

COMMERCIAL PHARMACY.

During the school year there will be given a series of lectures on topics pertaining to commercial pharmacy. Some of these lectures will be given by members of the faculty; others by specialists and by successful business men.

While the primary object of this school is to give training in scientific pharmacy, the fact that the modern pharmacist must be a business man is not lost sight of, and a special effort is made to prepare the student for a successful career.

TEXT-BOOKS.

The following text-books (latest editions) will be used:

FIRST YEAR.

U. S. Pharmacopœia, 1900.
 Caspari's Treatise on Pharmacy, Third Edition.
 Sturmer's Course in Pharmaceutical Arithmetic.
 Newell's Descriptive Chemistry.
 Green and Vanderkleed's Course in Qualitative Chemistry.
 Perkins and Kipping's Organic Chemistry.
 Kellerman's Botany and Spring Flora.
 Gould's Student's Medical Dictionary.

SECOND YEAR.

Ruddiman's Incompatibilities in Prescriptions.
 Halliburton's Essentials of Chemical Physiology.
 National Formulary.

EXPENSES.

Purdue University is a State institution; therefore, the trustees grant free tuition to all students who enter from Indiana. All others are required to pay an annual tuition fee of twenty-five dollars.

THE UNIVERSITY FEES required of all students, with the above exception, will be as follows:

Entrance fee, payable annually on matriculation.....	\$5 00
Tuition fee, per annum.....	*25 00
Incidental fee, per annum.....	10 00
Laboratory and library fees, per annum.....	20 00

One-half of these fees is payable at the beginning of the first semester and one-half at the beginning of the second semester.

After October 1, no fees will be rebated to students who have withdrawn, except in cases of disabling sickness, and then only when application for the same is made at the time of withdrawal.

*Chargeable only to non-residents of Indiana.

In addition a deposit of \$10.00 is required, to cover the cost of glassware and apparatus broken by the student in the laboratory work. The unused balance of this deposit is returned to the student.

At the end of the senior year a diploma fee of \$5.00 is required. *There are no other university fees.*

Table board may be had in LaFayette for \$3.00 per week. Furnished rooms, with two students in a room, can be had for \$1.00 (and over) per week. Other personal expenses are about the same as in any city of the Middle West.
